

Resinex™ AP UB SO₄

Strong base anion exchange resin

Resinex™ AP UB SO₄ is a high purity, premium grade, strongly basic macroporous anion exchange resin type 1. The macroporous crosslinked matrix offers a very high resistance to physical breakage and organic fouling. Its remarkable physical stability makes it highly suitable for industrial applications at very high velocities, such as condensate treatment and reversible removal of organics.

The uniform bead size of Resinex™ AP UB SO₄ is especially adapted for all modern counter-current systems (i.e. Schwebebett, UPCORE,..).
