

# Resinex™ HM-P79-BG

## Strong base anion exchange resin

Resinex™ HM-P79-BG is a high purity, premium grade, strongly basic macroporous anion exchange resin type 1. The macroporous crosslinked matrix offers a very high resistance to physical breakage and organic fouling. Its remarkable physical stability makes it highly suitable for the extraction of uranium. The selected bead distribution of Resinex™ HM-P79-BG is especially adapted for the Gold recovery
