Resinex™
Ion Exchange Resin

Resinex™ HM-P92-BG

Strong base anion exchange resin

Resinex™ HM-P92-BG is a high purity, premium grade, strongly basic macroporous anion exchange resin type 1. The macroporous crosslinked matrix offers a very high resistance to physical breakage and organic fouling. Its remarkable physical stability makes it highly suitable for the extraction of uranium. The selected bead distribution of Resinex™ HM-P92-BG is especially adapted for the Uranium extraction process (e.g. Resin-In-Pulp process)
